

IGSHPA Certified Geothermal Installer Training
2435 Dillard Street, Grand Prairie, TX 75051
September 25-27, 2012

This course is a three day comprehensive course focused on the installation of geothermal heating and cooling systems. The course includes an open book exam to become an IGSHPA accredited geothermal installer. You'll dive into the things to watch out for; pros & cons of system types; best practices - all from an instructor with real on the job experience!

Why Attend?

- Learn to design and install geothermal systems
- Become an accredited geothermal installer
- Hands-on pipe fusion certification
- Includes 7 Manuals and IGSHPA Membership
- Earn an important industry accreditation and get listed on IGSHPA's website. This is where most customers look for their installer
- The instructor for the course wrote the new IGSHSPA manual, "Design and Installation of Geothermal Heat Pump Systems"
