

Submittal Data Sheet Booklet

Range: Wilo-Stratos

> Single head pumps:

- Electronically controlled circulating pumps with flanged connection

> Applications:

- Hot-water heating systems of all kinds, air conditioning, closed cooling circuits, industrial circulating systems

> Special features:

- ECM-Technology for outstanding efficiency
- Cataphoresis coating for preventing corrosion in the event of condensation
- Maintenance free single-head circulator
- Automatically air venting

> Product advantages:

- Energy savings up to 80% over standard pumps
- For all heating, air-conditioning and cooling systems in the temperature range of 14 °F (-10 °C) to 230 °F (+110 °C)
- Optimal handling through frontal operation and frontal access to the terminal room (face to face)
- Variable installation positions
- Reliability and comfort during installation

Tag #	Model #	Flow	Head	Volt/Phase	Control	IF Module	Comments
	Stratos 2.0 x 3-35			230/1/60			

Control Modes

- p-v Pressure Differential Variable - factory default setting (set pressure is half at zero flow)
- p-c Pressure Differential Constant (set pressure constant)
- p-t Temperature Influenced Differential Pressure Control (IR Device Required to Activate)
- Automatic Night Set Back Activated - factory default setting
- Manual Speed Control (RPM x 100)

IF Interface Modules (optional)

- External Min/0 to 10 Volt DC (0 - 10 Vdc input remotely controls head set point or pump speed)/DP (Dual Pump)
 - External Min (control override) remote, volt free n/c contact
- External Off/OC (Operation Contact)/DP (Dual Pump)
 - External Off (control override) remote, volt free n/c contact,
 - Operation Contact, volt free n/o contact
- LON/DP (LonWorks BMS communication and Dual Pump)
