

# Wilo MVI Vertical Multistage Pumps

*Product Brochure*

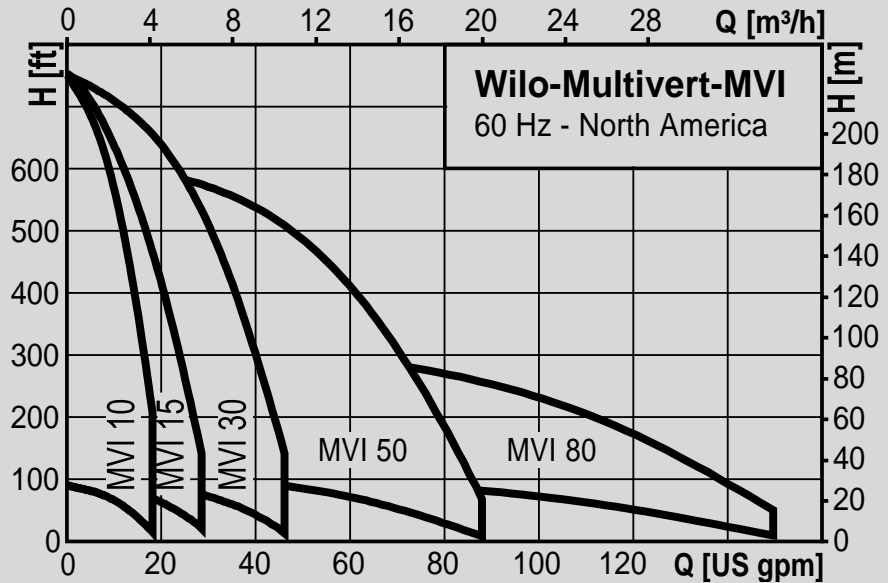

# Wilo MVI

## Vertical Multistage Pumps

- Applications Include:
- » Water supply & pressure boosting
  - » Condensate return
  - » Boiler Feed
  - » Washing and sprinkling systems
  - » Process engineering
  - » Cooling circuits

Wilo MVI

## Pressure Boosting Giant!

- » 100% Stainless steel construction
- » Flows up to 150 USGPM
- » Heads up to 750'
- » Standard TEFC Baldor NEMA frame motors
- » Built-in priming plug
- » Built-in air venting plug
- » Sleeve O rings eliminate thermal stress leaks
- » Two year warranty from date of purchase (complete unit including mechanical seal)
- » Available single phase 115/230V and three phase 208-230/460/575V
- » Tungsten carbide mechanical seal bearings
- » Two flange types (model dependant)
  - 2 Bolt oval - Companion flange threaded NPT
  - ANSI 250lb round flange for larger pumps
- » Extra thrust bearing in the pump end eliminates motor bearing thrust loads
